Sandstone Paving

We've recently added sandstone paving from Digby Stone to our product offering, which is available in two colours.

This cost effective stone range offers hard wearing properties and is available 15-22cm thick, 4 sized project pack of 14.72m².

With its natural riven surface, sandstone offers a traditional lightly split finish paving, which will catch the sunlight or reflect off wet surfaces, giving pleasure in any weather. Colours tend to look softer when the paving is dry, and more vibrant when wet.
